EDUCATION

D.K.T.E. Institute of Technology

B. Tech - Computer Science and Engineering

Aug 2019 – Aug 2023

Ichalkaranji, Maharashtra

Govindrao High School and Junior College

Higher Secondary Certificate

Jun 2018 – Feb 2019

Ichalkaranji, Maharashtra

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5/CSS3

Frameworks: React JS, Node JS, Express JS, Socket API, Redux

Database: MongoDB, SQL

Cloud: AWS

Developer Tools: MS Visual Studio, VS Code, Postman, Git

EXPERIENCE

Rheal Software Pvt Ltd | *Software Developer* | *React JS, Node JS, Express JS, MongoDB*

| July 2023 – Present

- Developed and maintained web applications using React, Node and MongoDB, delivering responsive and user-friendly interfaces. Implemented Redux for state management, ensuring a centralized and efficient data flow in the application, fostering maintainability and scalability.
- Understand requirements and transforms them into functional applications in line with business objectives. Implemented API's, authentication, and data validation to enhance security and performance.
- Utilized Postman for API testing and validation, ensuring robust and reliable performance in software development projects. Using its features to streamline testing processes and improve overall API quality.
- Working with 4-member team to develop an advanced user login system, Email OTP for enhanced security. Successfully executed the project, demonstrating technical expertise.
- Optimized and enhanced existing codebase for improved efficiency and performance by implementing restructuring and refinement techniques. Employed best practices to streamline and elevate overall code quality.
- Key Skills: React JS, Node JS, Express JS, MongoDB, Material UI and Tailwind CSS, REST APIs, JWT Authentication, Git.

PROJECTS

Emergency Assistance Admin Portal | *React JS, Node JS, Express JS, MongoDB*

| Mar 2024 – Present

- Developed and maintained web applications using the MERN stack, ensuring responsive and user-friendly interfaces.
- Designed and implemented user interfaces in React, seamlessly integrating Redux for robust state management. Also implemented interactive design solutions to enhance user experiences, demonstrating proficiency in both React and Redux.
- Developed high-performance back-end APIs with Node JS and Express JS, ensuring efficient data handling and seamless content delivery to front-end applications.
- Implemented MongoDB as the database, guaranteeing data integrity and optimizing performance for seamless storage and retrieval of application data. Integrated robust database solutions to enhance overall system reliability.
- Implemented API security using JWT tokens, and role-based access controls.
- Handled Git version control operations, including feature branching, pull requests, resolving merge conflicts, and code reviews for junior developers to maintain code quality and consistency.
- Actively participated in daily stand-ups, sprint planning, providing technical insights.
- Achieved a cohesive and scalable application architecture through thoughtful UI design and state handling.
- Implemented a scalable architecture to support the dynamic needs of the application, optimizing overall performance.

Emergency Assistance Dashboard | *React JS, Node JS, Express JS, MongoDB*

| Mar 2024 – Present

- Led the end-to-end development and maintenance of the Emergency Assistance Dashboard project, create dynamic and multifaceted solutions for seamless operations.
- Implemented Socket IO API for real-time chat functionality, enabling instant communication within the application. Leveraged bi-directional communication to facilitate dynamic message exchange and enhance user engagement.
- Showcased full stack development proficiency by adeptly managing both front-end and back-end components of the project, ensuring a cohesive and integrated solution.
- Utilized extensive database expertise to architect and develop API's and functions, ensuring efficient data retrieval and manipulation for seamless system performance.

Quick Assist 911 | *React JS, Node JS, Express JS, MongoDB*

| Mar 2024 – Present

- Integrated Leaflet.JS library for robust map functionality, employing its features for interactive maps with markers and layers. Enhanced spatial visualization, providing users with an effective and visually appealing map experience.
- Designed and implemented interactive user interfaces using React, including state management with Redux.
- Effectively collaborated within an daily stand ups and retrospectives to ensure project milestones were met.

GRIP - Globe Roof Inspection Program | *React TS, Node TS, Express TS, MongoDB*

| Nov 2023 – Mar 2024

- Designed and implemented CRUD operations using React.tsx Node.ts, Express.ts, and MongoDB, enabling efficient data management for key modules such as user accounts, product catalogs, and admin panels.
- Developed and enforced Role-Based Authentication and Authorization (RBAC) using JWT and custom middleware, ensuring secure and restricted access to application resources based on user roles.
- Integrated AWS S3 for secure file storage and retrieval and implemented file upload functionality resulting in scalable, high-performance media handling.
- Built responsive, modular UI using the Fuse Material UI Template, customized layouts and components to deliver a consistent, user-friendly interface aligned with business requirements.
- Utilized Jira for Agile-based task management, sprint planning, and issue tracking; regularly collaborated with cross-functional teams to manage epics, user stories, and bug resolution with clear documentation and progress updates.
